The Eisenhower Matrix

	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Submit lost-item reports containing the item's name, category, color, description, and location. ● Submit found-item reports with relevant item details. ● Search and compare lost and found reports to identify potential matches. ● Display submitted lost and found reports. ● Save reports to a file so they persist after the application closes.	**Schedule - (For V2.0+)** ● Assign compatibility scores to potential matches based on matching item characteristics. ● Add filters to sort reports by category, color, location, and date. ● Allow users to update an item's status to recovered or returned.
Not Important	**Delegate - (Use a library)** ● Use Java's built-in java.time package for date formatting. ● Use Java Swing components to create the graphical user interface. ● Use Java's built-in string and input-processing methods for basic input validation.	**Delete - (Cut it)** ● Integrated live messaging between users. ● User account registration and authentication. ● Push notifications for potential matches.
